

LB20 SERIES Link[®] Ramp Flat Mount (Bifold Design) and Spring Assist

This high-strength aluminum, surface-mount ramp installs easily into any vehicle with a flat surface. The unique design stores vertically and only takes seconds to position for use - increasing efficiency while reducing dangerous lifting and equipment damage. The optional Wheel Kit available helps transition the ramp more smoothly when deploying it on the ground.

LB20 Bi-Fold Flat Mount/Spring Assist:

- Flat surface mount
- Stores vertically inside the vehicle
- Reduces dangerous lifting
- Easy installation: takes seconds to position for use
- Optional wheel kit available

LB10 SERIES Link® Ramp

Side Door Mount (Bifold Design)

This high-strength aluminum ramp mounts on vans with side step and easily stores in the “dead” space above the step. The user-friendly design makes installation a snap, and requires only a few seconds to position for use.

LT30 SERIES Link® Ramp

Flat Mount (Trifold Design)

The trifold design of this flat surface mount ramp allows it to easily store vertically inside the vehicle. The adjustable leg allows for shallow load angles. The ramp can be removed in less than a minute.

LS50 SERIES Link® Ramp

Heavy Duty Straight Design & Heavy Duty Folding Design

This heavy-duty aluminum ramp is portable and perfect for general use applications. The LS50 is quick to position, and allows you to reduce dangerous lifting and equipment damage.

LWS40 SERIES Link® Ramp

Lightweight Straight Design & Lightweight Folding Design

This lightweight, portable, general-use ramp is ideal for loading and transporting lighter products and machinery. It works perfectly for rear or side loading, and is 30% lighter than our LS50 Model.

LSR90 SERIES Link® Ramp

Bifold Swivel Design

With 180° rotation and two storage locations, the Link Swivel Ramp offers flexibility for loading and unloading any cargo. It mounts in the rear stored position using a mounting plate combined with one of Link's durable spring-assist bifold ramps.

The LSR90 also incorporates safety and efficiency into its design. The primary latching module can be easily removed to provide open floor space, and the quick-release lever enables the ramp to be unlatched when in the wheel well position, without requiring users to bend, lift or enter the vehicle.
