

SPACEKAP™
TRANSFERABLE SERVICE BODIES

COMPAK

COMPAK

Our SpaceKap Compak model was designed to give you 320° of accessibility to maximize internal space. The ergonomic design of this transferable service body allows you to work completely from the outside. This reduces the need to hunch over thus saving you potential back injury.

WILD

The SpaceKap Wild is available in both 6 and 8 foot lengths and is also offered with or without side access doors. The Wild offers an unrivaled 320° of access to your equipment. The side door opening on our 8 foot version is an amazing 24" high by 84" wide. That combined with 40/60 rear doors, a Space-Slide sliding tray and/or one our Quick Ship Packages, will give you instant access to any part of your cargo.

DIABLO

The SpaceKap Diablo offers the largest interior volume available in the industry while being exceedingly aerodynamic. With an interior height of 6'3" all your employees will be able to stand up straight in this utility service body. Natural lighting from our skylights located at the front and standard energy-efficient LED lighting, 40/60 rear doors make the Diablo a benchmark in the industry.

DIABLO

* Shown with optional side access door.
